IGNITE Architects Pty Ltd

Chapel Hill Montessori is a Long Day Care Centre catering for children six weeks of age to school entry age. The Centre has been purpose designed and built with careful consideration to the children's needs, parents' needs, staff needs and the use of building materials and practices which respect the environment.

The building is comprised of expansive classrooms and a multi-purpose room, interconnected by an outside playground featuring two sandpits, soft-fall and artificial grassed areas.

By working closely with the client and the project manager Criscon was able to provide a personalised approach to this project, maximising their impact on the overall outcomes and project costs to deliver an exceptional result.
